

Mixing Masterclass

by Ivelin Mateev / Think Aloud – founder of Think Audio

This masterclass focuses on mixing a full track from start to finish. The videos cover practical techniques like volume balancing with pink noise, working with reference tracks, shaping the low end, enhancing kick and bass, managing transients, and applying EQ, compression, saturation, stereo width, and limiting. Together, these steps show how to bring clarity, depth, and impact to your mix.

Program

- Volume balancing using Pink Noise
- Working with reference tracks for overall mix direction
- Balancing the low end
- Kick punch and presence
- Layering bass for clarity and definition
- Compression and transient shaping
- Using EQ and saturation for tone and character
- Controlling stereo width and space
- Final limiting and loudness preparation
