FROM IDEA TO TRACK

4-week music production course by Think Aloud & Low Key Records

This course is designed for those who already have basic familiarity with Ableton Live. You don't need previous production experience, but you should be comfortable navigating the interface and creating basic MIDI/audio tracks.

New to Ableton? No problem!

You can absolutely join the course with no previous experience. Before we start, you'll receive a few short videos to watch at your own pace, covering the basic Ableton interface and essential tools you'll need during the course.

How the course works?

The course consists of 4 modules and takes place **once a week**, with each live session lasting 3 hours.

During each session, I'll guide you through the week's topic demonstrating my workflow, techniques and decision-making process step by step.

After every session, you'll receive a **practical homework assignment** based on what we covered. You'll then apply the same process to your own track at home, at your own pace and as much as your time allows.

Before the next session, you'll send me your work and I'll provide **individual feedback and guidance** on your progress. I'll follow your track throughout the 4 weeks and help you develop your own ideas and approach.

The goal is not simply to watch and learn, but to **follow the process yourself and apply it to your own music**.

Curriculum

Module 1: THE IDEA - Developing the initial idea, groove, drums, bass, musical elements, sound selection and building a strong foundation.

Module 2: ARRANGEMENT **-** Turning the foundation into a track through structure, variation, transitions, energy, automation and movement.

Module 3: PRODUCTION & DETAIL **-** Going deeper into sound design, processing, layering, editing and the small production decisions that make a track sound finished and interesting.

Module 4: MIXING & EXPORT - Learning how to mix the track by balancing levels, using EQ, and applying compression. The process covers low-end control, using a reference track, width and depth adjustments and more. Everything wraps up with the final export.

Course Details

• **Level**: Beginners / Intermediate
• **Software**: Ableton Live (free 1-month demo available on their site)
• **Length**: 12 hours (4 lectures x 3hrs)
• **Where:** Low Key Records, Sofia
• **Start**: 10.11.2026
• **End**: 01.12.2026

• **Price**: 300 EUR
